Energy Update

# Energy Update

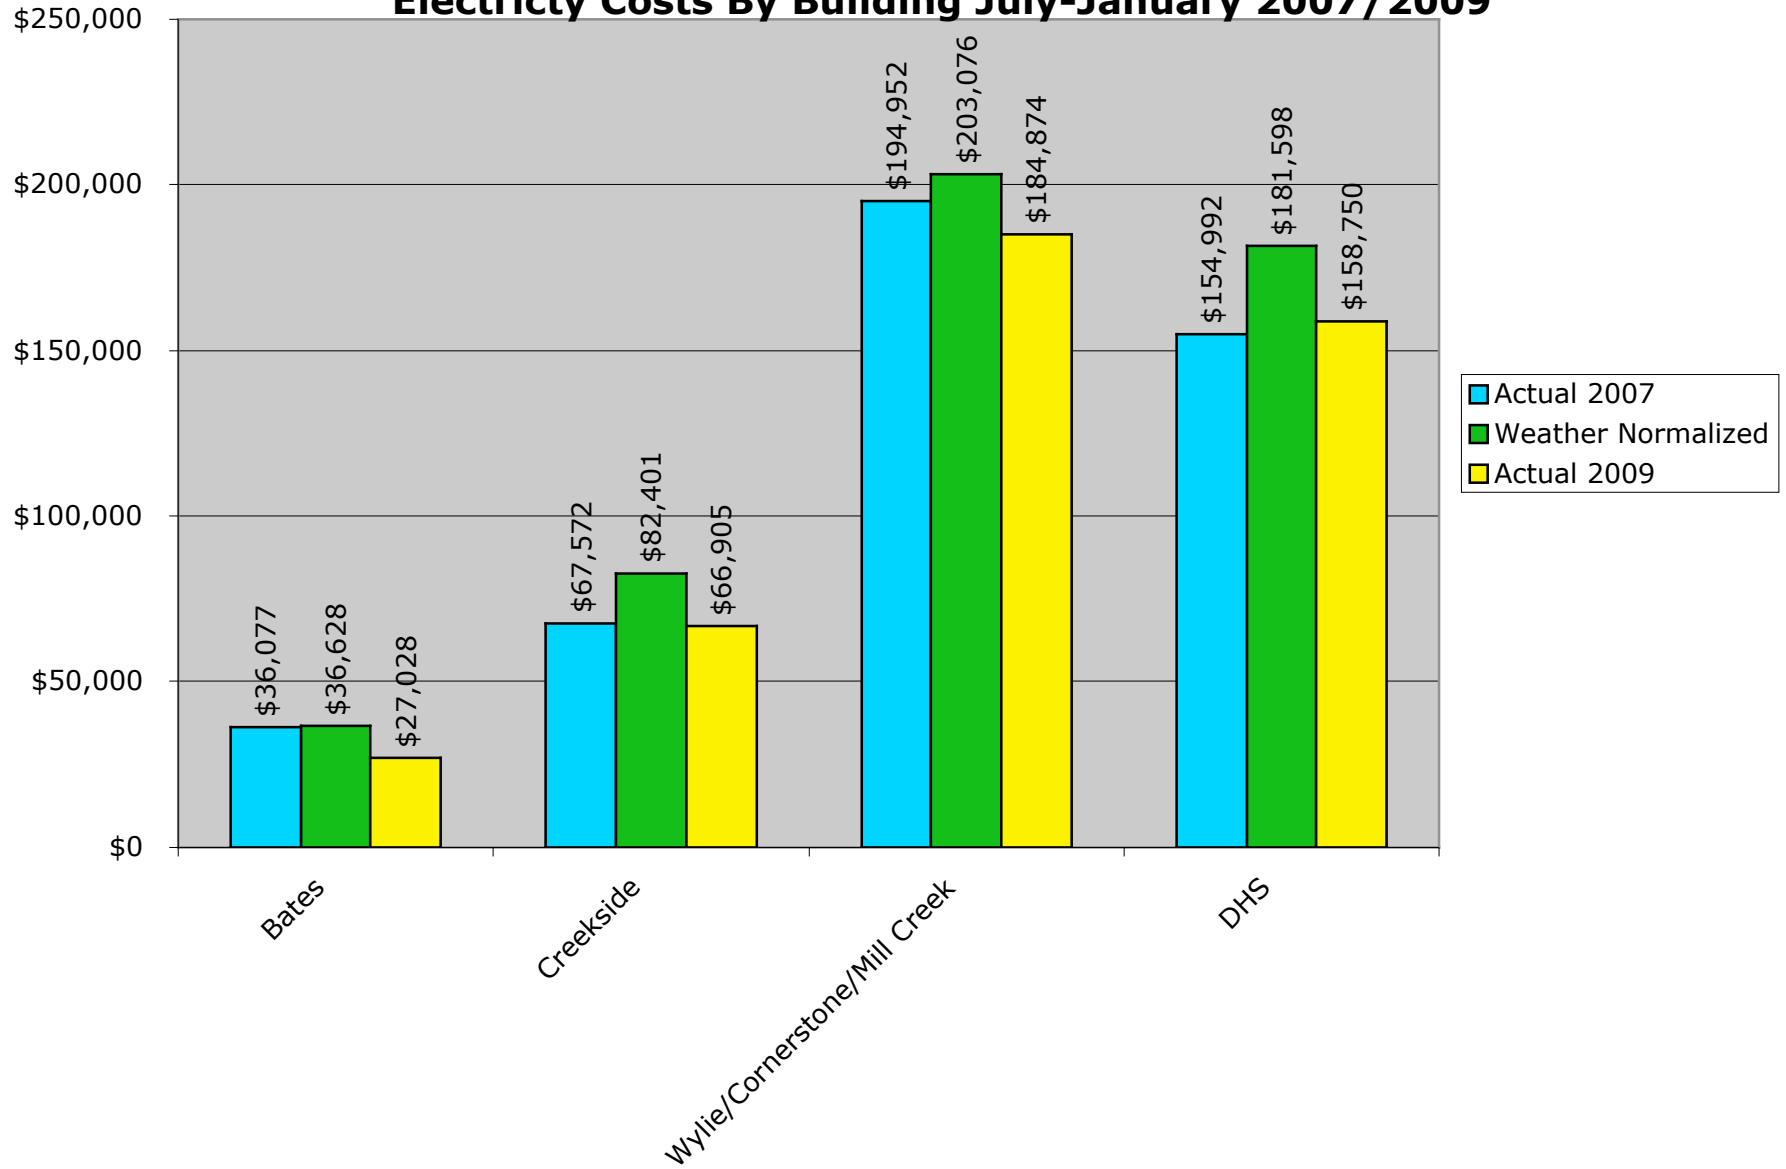

Baseline data from the Rebuild Michigan report (2006-07) was compared to actual usage in 2008-09 between July and January. The 06-07 data is listed as actual data and as “weather normalized” using data from the National Weather Service. Since the 06-07 school year was warmer than the same period in 08-09, comparing the weather normalized data to the 08-09 data is the best “apples to apples” look at our energy savings.

### Total Electric Use July-January 2007/2009

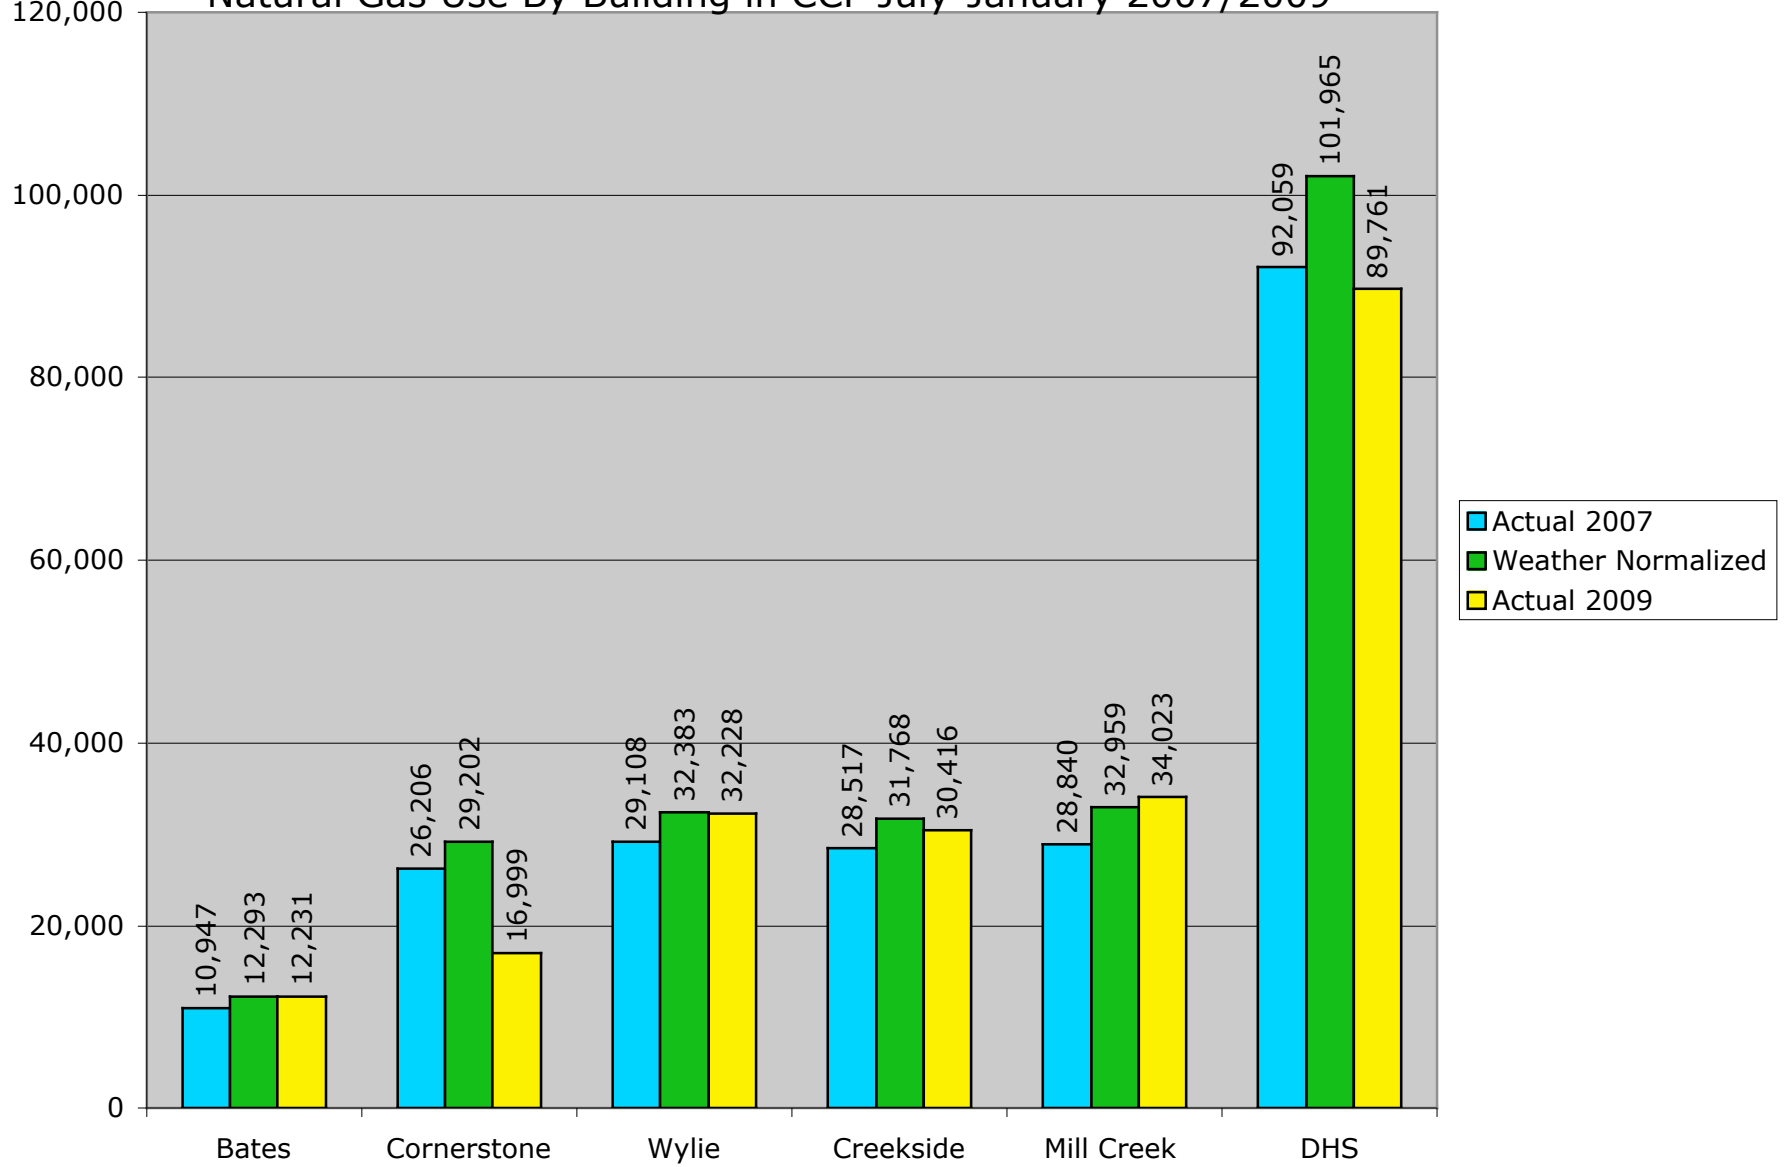

## Electricity Costs By Building July-January 2007/2009

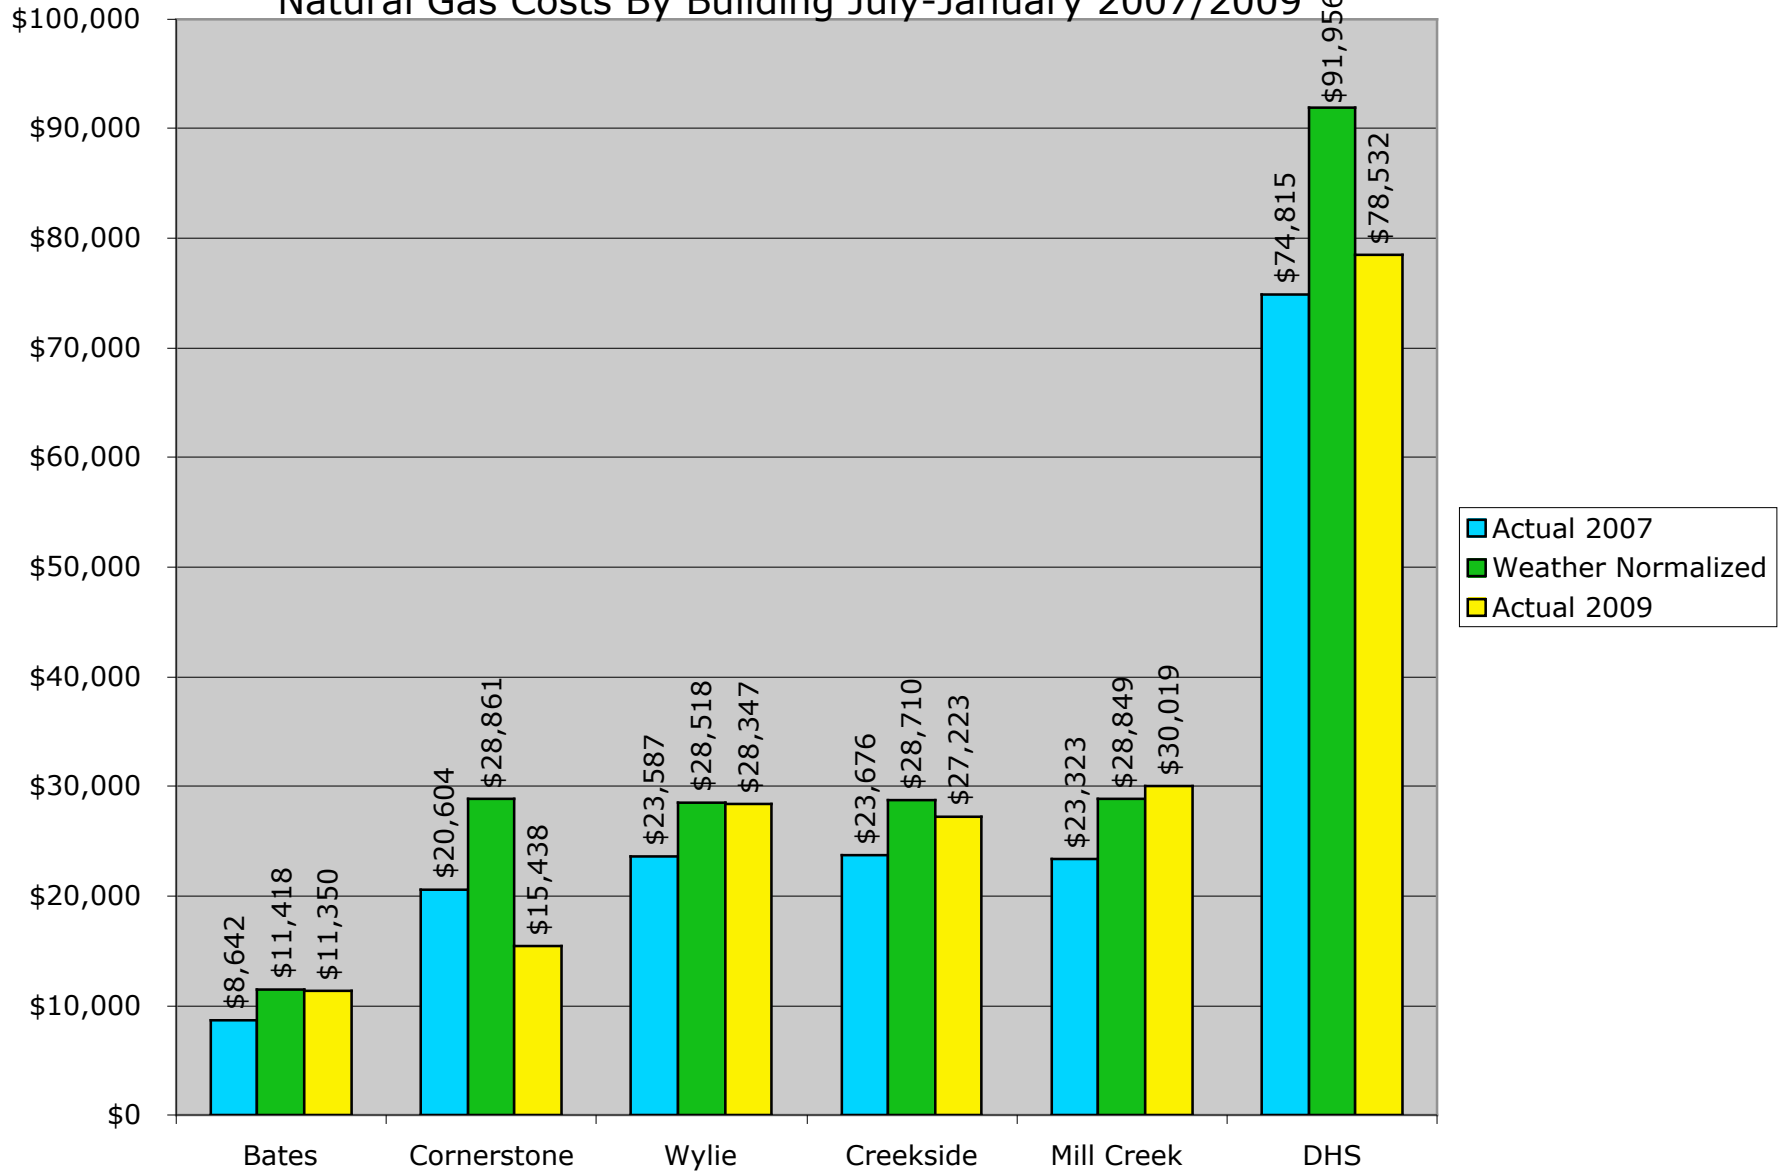

## Total School Electricity Costs for July-January 2007/2009

Natural Gas Use By Building in CCF July-January 2007/2009

Natural Gas Costs By Building July-January 2007/2009

## Total Building Natural Gas Costs July-January 2007/2009

### Total Gas Use (CCF) July-January 2007/2009
